## **PARTNERSHIPS WITH INDUSTRY**

- **Canadian companies, formerly associated with DREO, plan to locate on the DRES EPG to take advantage of facilities and support for work with CW agent**
- **While DND will be a prime customer, the companies will aim to pay their way through the sale of product and services**

**The CBDICE can expect from DRES:**

- access to knowledge generated through research
- access to products resulting from R&D
- the opportunity to consult and collaborate with DRES experts
- connections through DRES with universities, research councils and foreign defence laboratories

**DRES can expect from the CBDICE:**

- the ability to take products to market
- the ability to exploit the underlying technology of these products in the commercial marketplace
- an opportunity to leverage DRES resources

## **DRES Facilities:**

- **Experimental Proving Ground (EPG)**
- **Chemical Containment**
- **Biocontainment**
- **Animal Colony**
- **Inhalation Toxicology**

## **CB Defence Products Resulting from R&D at DRES:**

- **Minitube Air Sampling System**
- **Chemical Agent Detection System**
- **Nerve Agent Antidote (HI-6)**
- **Reactive Skin Decontaminant**

**SIGNIFICANT BENEFITS TO CANADA  
FROM INTERNATIONAL COLLABORATION**

- **An agreed definition of the CBW threat**
- **A common approach to hazard assessment**
- **Leveraging of the Canadian program through collaboration**
- **A mechanism for keeping a watching brief**
- **A network for advice in emergencies**

## **MAIN THRUSTS OF THE CBD PROGRAM**

- **Detection and Identification of BW Agents**
- **Medical Countermeasures Against BW Agents**
- **Integrated Protective Clothing for Hot Climates**
